Page 4 of 4

It is important for students to monitor their study progress and complete all requirements for graduation in time. As a general reference, the credits you have attained should be proportional to the stage you are on the programme. That is, if the normal duration of your programme is 4 years and you have already studied for 2 years, you should have completed half of the credits required. In addition, all GUR subjects should normally be completed within the first 2 years of study. If you wish to seek advice on your study plan, you can approach your academic advisor of your host department. For advice on issues related to GUR, you may also contact your counsellor from the Office of General University Requirements.

Points to Note:

1. The checklist shows the various 'Sets' of graduation requirements assigned by the Major Department (and where appropriate also the Minor Department or the 2nd Major Department) as well as other university requirements, which are shown under 'Nature Requirement' and 'Other Graduation Requirement'. Information is presented in order of the Major Set ID(s) followed by the Minor Set ID and then Nature and Other Requirements. To be eligible for consideration of graduation, a student has to fulfill one of the Sets and all the requirements within that Set. In addition, the 'Nature Requirement' and 'Other Graduation Requirement' must all be satisfied.
2. Subjects marked with "Y" under the "Duplicate Indicator" column
Some subjects taken may meet more than one Subset requirements and they are marked with 'Y' under the 'Duplicate Indicator' column. Please note that such subject can eventually fulfill only one of these Subsets for GPA and credit fulfillment for graduation as double counting will not be applicable. Thus students are required to take another subject in these subsets in order to fulfill the credit requirements. Double counting will, however, be allowed for those subjects so approved for Major/Minor or Double Majors (reference the approval form(s) on double counting, if any, appended at the end of the checklist).
3. ALL subjects required under DSR and LCR will be shown, except in the case of the following:
 - For "Free Elective" Subset under DSR, only subjects with grade(s)/registration record(s) and under the "Ug-Free Elective Pool (2012 Curriculum)" will be shown.
 - For GUR, only subjects with grade(s)/registration records will be shown.

Note: If your graduation requirements contain "Free Elective", you will be asked to select the subjects to fulfill this Subset when you eventually apply for graduation. You can choose any subject (excluding level-0 subjects and training subjects) you have taken and not necessarily inside the "Ug-Free Elective Pool (2012 Curriculum)" for the purpose. A "@" code will be displayed next to the Subject Result of these Selected Free Elective Subjects. However, subjects once used to fulfill the "Free Elective" requirement will **NOT** be taken to fulfill other requirements, e.g. DSR, GUR, Minor, etc.

4. The checklist is for reference purpose and students should refer to the relevant Programme Requirement Document(s) for the detailed subjects/credits requirements for completing the programme(s). They should contact the relevant Programme Offering Department(s) if they have any queries or find any discrepancies between the Programme Requirement Document(s) and the checklist.
5. In addition to the finalised subject grades (display after subject result announcement), the following codes will also be displayed under the column of Subject Result:

R	-	Subject Registered	T	-	Credit Transfer without Grade
W	-	Subject Withdrawal			(Grade granted by Credit Transfer is shown in brackets)
LA	-	Late Assessment (Pending)	Z	-	Subject Exemption
RC	-	Subject(s) with Recognised Credits (RC) will be taken as fulfilling the requirement for the subset. However, these subjects will not be counted towards credits attained and therefore will not be counted under the "Subset Credit" column.			
#	-	Subject(s) approved to be double counted for fulfilling the graduation requirements of both Major and Minor programmes.			
@	-	Free Elective subject(s) selected in the last "Application for Graduation" exercise. If you have not eventually graduated in that exercise, you will need to re-apply for graduation and re-select the Free Elective subject(s) at the semester in which you will graduate.
